As a part of our ISHA School Affairs Team, we would like to share one resource used by one of our team members per month.

Here is the resource chosen for August:

Teach Me Language

By Sabrina Feeman Ph.D. and Lorelei Dake B.A.

This program provides a step-by-step format for teaching language weaknesses present in kids with autism and related disorders. Areas addressed include social language, general language (vocabulary concepts), grammar/syntax, advanced language (narratives), and academic language. It provides explanations, examples, templates and activities that are to be presented in a progressive manner.
